

## Construction Update – May 13, 2021

The work on North Avenue remains on schedule.

Today, the Contractor will be patching in the excavated areas, cleaning the roadway, and sealing the cracks in the lower layer of pavement in preparation for the new asphalt surface.

The roadway is scheduled to be paved on Friday, May 14<sup>th</sup>. Traffic will be very restricted but it will still be open for those who need to access businesses and residences. There will be flaggers on both ends allowing traffic to travel in both directions, taking turns, on one side of the roadway. There will be restrictions to driveway access as the paving operation passes in front of driveways to allow the pavement to be placed and compacted before vehicles can drive on it. If you need to cross the new pavement to get into a driveway, please stop, use your blinker, and workers will let you know if you can get into the driveway or not. Once the pavement has cooled enough for traffic to be on it, vehicles may cross it and traffic will be switched to the new pavement so that we can pave the opposite side.

North Avenue remains closed to Thru Traffic. Access is to businesses and residences only. Please find an alternate route if you are passing through the area.

Pavement markings are scheduled to be placed on Saturday Morning.
