

Construction Update – May 14, 2021

The paving of North Avenue begins this morning. The paving work will last into the afternoon and we expect it to be completed by mid-afternoon. Please be extra patient today as North Avenue will be very restricted with flagging operations on both ends. Only one lane will be open as the other side of the roadway is being paved. Once the asphalt is paved on one side of the roadway and it cools down enough, traffic will be switched over to the new pavement so we can pave the remaining side of the roadway. As the work progresses down North Avenue, there will be driveway restrictions to allow the asphalt to be placed and compacted prior to crossing it.

No parking will remain until the end of the day on Saturday, May 15th. Pavement Markings are scheduled for the morning of Saturday, May 15th. Upon completion of the pavement markings on Saturday, North Avenue will be completely finished and reopened to thru traffic.

On Monday, May 17th, the Contractor will move to the next phases of the annual paving program which are not located in downtown Hartland. The rest of the paving program includes rehabilitation of a portion of the Ice Age Trail just off of Lawn Street and work on South Industrial Drive in the industrial park. On Monday, the Contractor will also clean up all remaining barrels, cones, and construction equipment on North Avenue.

We appreciate your continued patience throughout the work we've been completing downtown – it has allowed us to complete the project quickly and safely.
