

Construction Update – May 25, 2021

Road work will begin on South Industrial Drive beginning on Wednesday, May 26th, 2021. The work will be from Cardinal Lane around the turn onto E. Industrial Drive to approximately 650 E. Industrial Drive. The work will consist of pulverizing of the existing asphalt, regrading and reshaping the roadway, excavation of soft spots within the roadway, paving of brand new asphalt pavement, and reshouldering along this section of South Industrial Drive. The Pulverizing will begin on Wednesday, May 26th and the work is expected to last approximately three weeks. As work occurs, there will be disruptions to traffic and periodic disruptions to driveway access along the project area. There will be a signed detour on Cardinal Lane/Progress Drive/E. Industrial Drive to direct through traffic around the project area. The roadway will be open but only for access to the businesses along the roadway. Please do your best to avoid the area and seek an alternate route if possible and if just traveling through and not to one of the businesses. Please allow for extra travel time and pay attention to directions from workers – they will get you to where you need to go as soon as it is safe. Your patience is appreciated as we work to complete this roadway rehabilitation project.
